Communities where the digital bank operates are also stakeholders, albeit indirectly. The bank's activities can impact the local economy, job market, and overall well-being of the community. Their role is to provide support and feedback, as well as benefit from the bank's contributions to the community.

Digital banks often collaborate with various partners and service providers to deliver their services effectively. These may include technology vendors, payment processors, cybersecurity firms, and others. Their role is to provide the necessary infrastructure, expertise, and support to enable the digital bank to operate smoothly.

conduct audits, and provide oversight to ensure the digital bank

operates legally and ethically.

Management/Board

of Directors

Employees are essential stakeholders who work within the digital bank. They include executives, managers, customer service representatives, developers, and other staff members. Their role is to execute the bank's operations, provide customer service, develop new products and services, and contribute to the overall success of the institution.

Employees

The management team, including the board of directors, is responsible for overseeing the operations of the digital bank. They set strategic goals, manage risks, and ensure compliance with regulations. Their role is to make key decisions that impact the direction and performance of the bank.
